**2022**

Expansion to Portugal, USA, Poland.

**Certificate 14001 in progress!**

(Man)Power for your  
Wind Energy Projects.

With our teams of skilled workers we are striving for our greatest goal: Help implementing the energy transition. We operate world-wide – onshore and offshore – and have set up a well connected service network to offer the best quality to our customers.

# Allround Service

## Service & Maintenance

Within the framework of long-term contracts, trained 2-3 man teams carry out operation and maintenance work on various types of turbines and do repairs as required.

## Rotor Blade Service

Our specialized teams are well acquainted with fibre composite technology and are working world-wide: Either from the rope or from one of our rotor blade work platforms.

## Onshore Projects

Versatility is what characterizes this unit. The growing portfolio ranges from the installation of wind turbines and the implementation of upgrades to the general site service.

## Personnel Solutions

We provide qualified technical personnel for time-bound assignments in on-/offshore wind energy projects. Our recruiters work with an international network to be able to find the right candidate at any time.

We are happy to present our service to you, please contact us for an appointment. E-Mail: [info@rts-wind.de](mailto:info@rts-wind.de)

We're creating  
the Future.
